DOB: 30 July 2002

PROFESSIONAL SUMMARY

Motivated Helpdesk Engineer with hands-on experience in IT support, networking, surveillance systems, and technical troubleshooting. Strong background in quality control, Surveillance Systems, ICT support, PA systems, and multimedia operations. Adaptable, reliable, and committed to delivering efficient technical solutions.

CORE SKILLS

- Technical Support (L1–L2)
- Networking & Server Support
- CCTV & VMS Configuration
- ICT Troubleshooting
- Report Writing & Documentation
- Problem-solving & Adaptability
- Teamwork & Communication
- Electronic Access Control (EAC) System Termination & Troubleshooting
- Building Management System (BMS) Termination & Troubleshooting

TECHNICAL SKILLS

- Systems & Networking: Windows Server, Linux Debian, Cisco Packet Tracer, OMADA, Sangfor, Sophos, Dell, Huawei, Netgear
- Surveillance Systems: Hikvision, Dahua, Wisenet, Milestone VMS, HikCentral
- Software Tools: Canva, Proteus, Arduino, Microsoft Office (Word, Excel, Powerpoint, Access)
- Programming: C++, Java, MySQL, HTML

LANGUAGE

- Bahasa Melayu
- English

WORK EXPERIENCES

Helpdesk Engineer

Advance Jupiter Sdn Bhd | Sep 2024 – Present

- Provided L1–L2 technical support for IT infrastructure, including servers, networks, and surveillance systems across various client environments.
- Assisted in configuring and maintaining network devices, security systems, servers, and monitoring platforms under the guidance of senior engineers.
- Supported deployment and troubleshooting of surveillance systems and video management software, including Hikvision, Dahua, Wisenet, and Milestone VMS.
- Conducted routine maintenance, firmware updates, and system health checks to ensure operational reliability.
- Worked across diverse hardware and software platforms such as Dell, Sangfor, Huawei, Sophos, Honeywell, Netgear, Hikvision, Cisco, Raisecom and Comhigher.
- Recorded and tracked technical issues using internal CRM and support systems, ensuring timely resolution and accurate documentation.
- Coordinated escalation cases with L2/L3 teams and vendors for complex technical issues.
- Installed and configured CCTV surveillance systems (analog and IP) at residential, commercial, and industrial sites according to client requirements.
- Performed routine maintenance and troubleshooting of CCTV systems, including camera alignment, NVR checks, and cabling inspections.
- Diagnosed and resolved issues related to video signal loss, power failure, and recording malfunctions, reducing downtime by up to 80%.
- Prepared documentation and maintenance reports after each service or installation for project tracking and client records.
- Supported remote monitoring setup through PC clients, ensuring user-friendly access for clients.
- Support Building Management System (BMS) project - Doing termination, continuity test, point test using BMS Controller Software

Quality Control

China Communication Construction(CCCC)-ECRL| July 2023 – Sep 2024

- Conducted quality checks on coring samples post-DSM work.
- Monitored and recorded site activities from start to completion.
- Prepared and submitted construction and inspection documentation.
- Reported faults and findings to engineers and HQ.

Technician - Industrial Training

Jabatan Penyiaran Malaysia (RTM)| Jan 2023 – Jun 2023

- Assisted with PA system setup and stage arrangements.
- Performed ICT tasks: formatting, installing software, network setup, and printer configuration.
- Labeled and verified government assets worth millions.
- Supported news recording, live broadcasting, and editing.
- Conducted mechanical and electrical tasks.

EDUCATION

Bachelor Of Science Computer (Honours) - Inprogress

Universiti Teknologi Mara Shah Alam
Target Graduated: 2028

Diploma Engineering Electronic (Computer)

Politeknik Sultan Mizan Zainal Abidin
Graduated: 2023

Sijil Pelajaran Malaysia

SMK Dato' Razali Ismail
Science Computer, Accounting
and Economy course
Graduated: 2019

CERTIFICATIONS & COURSES

- NIOSH Tenaga Safety Passport (NTSP)
- NIOSH TM Safety Passport (NTMSP)
- CIDB
